

CARE INSTRUCTIONS

DO NOT DRY CLEAN

LAUNDERING:

Wash in cold water with technical gear wash or mild soap. Typical detergents should not be used, as they will break down materials and decrease product performance.

Wash by hand, or in a front loading washer, gentle cycle.

DO NOT use a top loading washing machine.

DO NOT use bleach.

Ensure product is fully rinsed.

DO NOT wrinkle or twist. Take care not to stretch or pull when wet. Water weight can strain seams; careful handling when wet is required to prevent damage.

DRYING:

Air dry, line dry or use a large commercial dryer on low heat. Fluff with hands periodically while drying. Always dry completely before storing.
